Certified Scrum Product Owner (CSPO)®

Scrum is the best known Agile methodology, allowing for effective IT project management. It let you see what's really happening in your project, deliver value to your product incrementally and get feedback faster.

Scrum changes the way of managing IT projects. Moving away from the traditional, formal management, it emphasizes self-organization of the team. Therefore, Scrum Team no longer needs typical project manager, and his place is filled with two new roles - Scrum Master and Product Owner.

Two-day advanced Certified Scrum Product Owner (CSPO) training introduces participant into the role of business representative - Product Owner. Through interactive exercises, lecture and discussions attenders learn Scrum principles and how Product Owner cooperate with customers and stakeholders and leads team to achieve the vision and maximize the Return of Investment (ROI) of developed product. During the course Certified Scrum Trainer walk with participants across complete process of product definition: from creation of Product Vision, via definition of Business Drivers and identification of users to creation of Product Backlog using User Stories and drafting Release Plan in the form of User Story Map. Numerous examples from different organization and product help better understand discussed topics and apply learned techniques in day-to-day work.

Who should attend?

Certified Scrum Product Owner training is intended for individuals wishing to better understand process and practices of product discover, especially Product Owners, Product Managers, ScrumMasters and anyone involved in cooperation with customers and users or in gathering, analysis and validation of requirements and expectations.
